Date: December 21, 2022

To: Customers of Copeville Special Utility District (SUD)

From: Board of Directors

Subject: Notice of Water Rate Change

As you probably know, the Copeville Special Utility District buys all of its water from the North Texas Municipal Water District. We were notified in September 2022 by North Texas Municipal Water District that the cost of water would increase by 13% beginning October 1, 2022. As a result of this increased cost the District performed a rate study to obtain correct information on what the rates for the District should be. As a result of the rate study please see below for the new water rates. If you are using 5,000 gallons per month, your bill will increase by \$4.65. All rates below do not include the Service Fee.

Our existing rates are:

0-5,000 gallons	\$7.12 per 1,000 gallons
5,001-10,000 gallons	\$10.11 per 1,000 gallons
10,001-20,000 gallons	\$10.71 per 1,000 gallons
Over 20,001 gallons	\$11.29 per 1,000 gallons
State mandated regulatory assessment fee	½% of total water usage

Our new rates will be:

0-5,000 gallons	\$8.05 per 1,000 gallons
5,001-10,000 gallons	\$11.42 per 1,000 gallons
10,001-20,000 gallons	\$12.10 per 1,000 gallons
Over 20,001 gallons	\$12.76 per 1,000 gallons
State mandated regulatory assessment fee	½% of total water usage

The new rates will be effective beginning February 1, 2023 and will be reflected on your bill which is due March 10, 2023.

Please be assured that the Board of Directors is committed to providing all customers of the Copeville SUD with safe and dependable water at the most reasonable rates possible. If you have any questions or comments, please contact the district's office at 972-853-4630.
