Subject: Notice of Water Rate Change

The Copeville Special Utility District buys all its water from the North Texas Municipal Water District. We were notified in September 2025 by North Texas Municipal Water District that the cost of water would increase beginning October 1, 2025. As a result of this increased cost the District performed a rate study to obtain correct information on what the water rates needed to be for the District to meet our financial obligations. As a result of the rate study please see below for the new water rates and Service Fee. If you are using 5,000 gallons per month, your bill will increase by \$3.00 not including the Service Fee.

Our existing rates are:
